April 9, 2009

Dear Reader:

Good Afternoon! My name is Keria. I am a student at Como Park Elementary. In my class we are learning about Global warming which is why I am writing this letter today. Global warming is something we all need to know about because it can cause a lot of bad things to happen. One major thing that can affect us is disease because diseases can kill People. I believe that Global Warming can be slowed down because there are a lot of things we can do about it. Global warming will affect us in a lot of ways and one of them is disease. There are a lot of people who die from Global warming. People are dieing more and more because Global warming is getting worst. I believe that each and every one of us can make a change by helping slow Global warming.

People believe that Global warming is causing many different diseases. Scientists proved that most of these diseases come from mosquitoes. When the earth gets hotter there is more mosquitoes born and they bring diseases on to people. The major disease that is killing a lot of people is malaria. I believe that if every one worked together we could slow Global Warming so that we would have fewer diseases.

People also believe that global warming doesn't make diseases worse because they think global warming is natural. Because they think its natural they also say that nothing can stop it or slow it down so they don't bother not using much electricity. People believe different things about global warming.

I know we can do something about this problem so lets try. If everyone knew about Global warming causing diseases then they would all want to do something about it. We can try and do something about this by not using much electricity and other things that making Global warming go faster.

I recommend that we use less electricity and things that doesn't use a lot of co2. This will help us because then we can slow down Global warming and we have more fresh air to breath.

Thank you for taking your time to read this letter. I will want to hear from you soon.

Sincerely,

Keria
